Hella PHP Events

Installation and User Manual

Installation

You will need:

- Downloaded zip file of this software
- Text editor
- FTP client
- Access to your server's PhpMyAdmin

Instructions

Extract the zip files to your hard drive, leaving the file and directory structure intact (this is important for the site to function properly).

Use PhpMyAdmin to Install the Database

Log into your server's PhpMyAdmin using your credentials (contact your host if you do not know your credentials). Create a new database using utf8_general_ci collation. Once the database has been created, open it and click the Import tab at the top. Click the "Choose File" button and select the hellaphpevents.sql from the extracted zip. Click Go.

Update the MySQL Credentials

Open "uploads/mysql_connect.php" and replace the values for DB_USER, DB_PASSWORD, DB_HOST, and DB_NAME in their define statements with your MySQL credentials and name of the database you created. Save and close the file.

Editing the Site Title

Open the file "includes/languages.inc.php" and locate this line:

```
define('SITENAME','Hella PHP Events');
```

Change the words Hella PHP Events to your site title. Save and close the file.

Changing the Graphical Banner

To change the graphical banner, open the images/ folder and replace the banner images with your own images using the same names and image dimensions. The image dimensions for each banner size are as follows:

- blurredbanner.png – 1800 x 450
- blurredbanner1024.png – 1024 x 256
- blurredbanner768.png – 768 x 192

Editing the Main Page Content

Open the “includes/index.inc.php” file. The page is divided into 3 sections: the first paragraph of the main page content, the “rest” of the main page content, and the side bar content. Locate html the comments in the code that indicate what areas are safe to edit for each section, and replace that content with your own. Save and close the file.

Upload Files

Log in to your server with your favorite FTP client. Upload the contents of the “public_html” directory to your server’s public web directory (usually “public_html”, “www”, or “htdocs”). Make sure that the file and directory structure remains intact. Upload the “uploads” folder so that it is on the same level as the public web directory folder.

Log In for the First Time.

Log in as the super user and change the password.

Important: for security reasons you should log in as the super user immediately after installation, and change the default password.

Welcome to Hella PHP Events!

This is a demonstration of Hella PHP Events – a web application that allows users to sign up (RSVP) for events. Below is a general summary of features. Please see the documentation for more detailed information about this application’s features and what each role can do.

What can I do as a guest (unregistered/signed out)?

- View the upcoming and past events, however the location of the event is hidden.
- View event detail page (location is still hidden).
- View the event calendar (monthly view).
- Register (Sign Up) as a new member.

What’s New

- Sort events by name, date, or location.
- Sort members by display name or role.
- Change your password.
- Calendar view with events.

Using your favorite browser, visit your domain where you installed Hella PHP Events, and open “index.php”. Click on the “Log In” button located at the top right of the web page. Once the log in page opens, enter the default Super user login and password:

Login: suser

Password: YyG-j62s!W

Log In

Log in:

Username:

Password:

© 2015 Hella PHP Events

To change the super user password: Once logged in, click on the “My Profile” link located at the top right of the web page (next to the “Log Out” link). Under the heading “Member Profile” there is a button to “Change Password” – click this button to open the change password page. Enter the current (default) super user password. Enter your new password, and confirm it. Click Submit.

Note: While it is possible to use the super user account as an admin account, the super user account should only be used to promote members to Admin status. It is recommended that you create an Admin account for your own use. Only the super user account can promote and demote members to/from the Admin role. The following sections explain how to create new accounts and promote and demote members.

Using Hella PHP Events

Browsing as a Guest

Guests (unregistered users) can use the site to browse events, but cannot interact with the events or view member information. In order to make use of the site, users should sign up to become a member.

Signing Up

Welcome to Hella PHP Events!

This is a demonstration of Hella PHP Events – a web application that allows users to sign up (RSVP) for events. Below is a general summary of features. Please see the documentation for more detailed information about this application's features and what each role can do.

What can I do as a guest (unregistered/signed out)?

- View the upcoming and past events, however the location of the event is hidden.
- View event detail page (location is still hidden).
- View the event calendar (monthly view).
- Register (Sign Up) as a new member.

What's New

- Sort events by name, date, or location.
- Sort members by display name or role.
- Change your password.
- Calendar view with events.

Click the Sign Up link at the top right of the site.

Complete the form with your email address, chosen username, and password. Please note that you must select a unique username. If the username is in use you will be prompted for a new one. It is recommended that you use a secure password that is not easily guessed.

Logging In

Welcome to Hella PHP Events!

This is a demonstration of Hella PHP Events – a web application that allows users to sign up (RSVP) for events. Below is a general summary of features. Please see the documentation for more detailed information about this application's features and what each role can do.

What can I do as a guest (unregistered/signed out)?

- View the upcoming and past events, however the location of the event is hidden.
- View event detail page (location is still hidden).
- View the event calendar (monthly view).
- Register (Sign Up) as a new member.

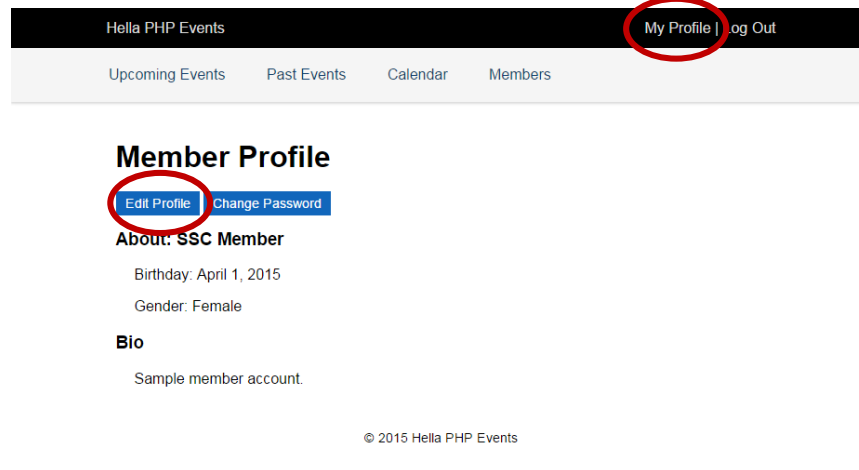

What's New

- Sort events by name, date, or location.
- Sort members by display name or role.
- Change your password.
- Calendar view with events.

Once you have an account, click the Log In link located at the top right of the web page. Enter your username and password and click “Log In”.

Edit Profile and Display Name

Once you are logged in, click on the “My Profile” link that should now appear at the top right of the web page (replaces the Sign Up) link.

To edit your profile, including your display name, click the “Edit Profile” button. On the Edit Profile page, enter your first and last name (your real name is only visible to event coordinators and admins, who will need it to verify the guest list).

You may change your display name – this is how you will appear on the site to other members. Note that changing your display name does not change the username you use to log into the site.

Enter your birthday using the 2 digit month and day (include leading zeros) and 4 digit year. Alternatively, you can use the date picker by clicking on the Choose date link.

Select your gender from the 3 options (male, female, or other). Optionally, complete a short biography to tell fellow members about yourself. Click Submit to complete the changes.

Changing Your Password

Once you are logged in, click on the “My Profile” link that should now appear at the top right of the web page (replaces the Sign Up) link. Once on your profile page, click the “Change Password” button. Enter the current (default) super user password. Enter your new password, and confirm it. Click Submit.

Coordinator Functions

The following site functions are available to coordinators role members and above. See the section on editing member roles (under administrator functions) for how to promote members to coordinators.

Adding Events

Log into your event coordinator or administrator account. The “Add Event” button will now appear on the main navigation menu. Click the “Add Event” button. Complete the form with all the event details including name, tag line, and description. Select the start and end date using the date picker or enter the dates in the format *mm/dd/yyyy* with leading zeros. Select the time, ensuring the start time occurs before the end time. Select the location from the drop down list. Click Submit to create the event.
